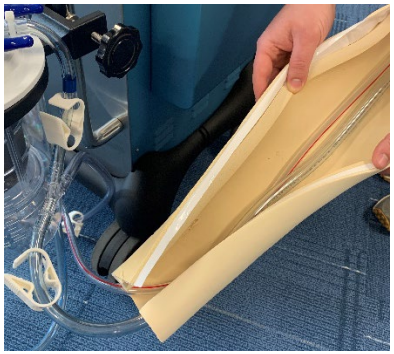
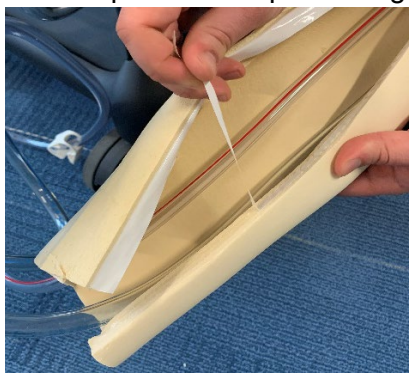
IFU-3610. Ver.3 1 June 2022

To apply casing to desired tubing:

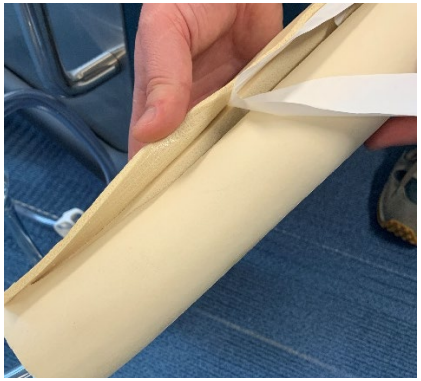
1) Open ThermoCasing at slit and wrap ThermoCasing around length of tubing.

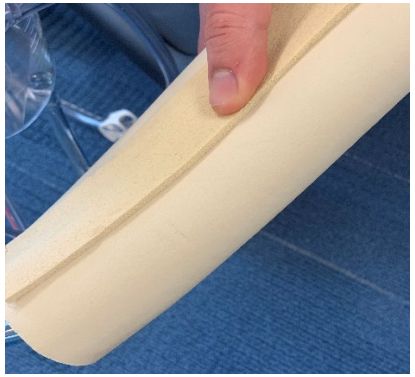


2) Locate the end of white release paper for the self-seal strip and peel approximately 8” of strip, revealing adhesive. Press inner edges of ThermoCasing together to seal. Repeat this step in 8” segments for entire length of ThermoCasing.



3) Remove the release liner on the outer flap, and apply even pressure to completely close the lap onto the outer surface of the ThermoCasing.





4) At end of case, dispose of the single-use ThermoCasing with the other disposable components.
